

SANITATION PROTOCOL

Deep cleaning done before a new animal occupies an enclosure

1

Remove all items and organic matter from enclosure. ALL visible debris must wiped off.

2

Spray Rescue on all surfaces until visibly wet and scrub. Don't forget all the nooks and crannies.

3

Rinse all surfaces with water and dry with clean towel.

4

Apply Rescue again to all surfaces and let sit for 5 Minutes

5

Wipe down all surfaces with wet and clean wash cloth and allow to dry fully.

6

Reset the Enclosure for next occupant.

Repeat steps 4 and 5 in cases of infectious diseases.
